Program Overview

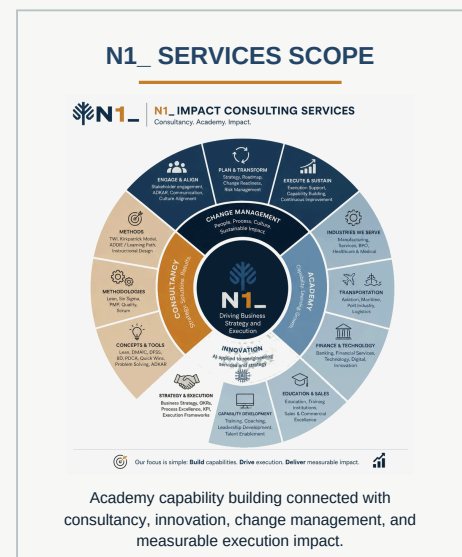

Business Intelligence for Decision-Making helps participants understand how dashboards, performance views, and data storytelling can support faster and more informed business decisions. The workshop focuses on practical BI thinking rather than technical system development.

Scope

Introduction to BI concepts that transform data into visual, actionable decision support for leaders and teams.

Core Content Areas

BI Concepts Dashboards Data Interpretation Power BI Awareness

BUSINESS IMPACT

Improves real-time visibility, strengthens decision support, and builds digital-age analytical capability across teams.

Curriculum Overview

Business Intelligence for Decision-Making - public program map

Detailed templates, facilitator guides, examples, and proprietary implementation logic are reserved for enrolled participants and authorized N1_ delivery teams.

Block 1 - BI Fundamentals

Understand what Business Intelligence is and how it supports organizational performance.

Block 2 - Dashboard Thinking

Differentiate data display, performance monitoring, and decision-support visualization.

Block 3 - Insight Interpretation

Read performance signals, spot trends, and ask better business questions from visual data.

Block 4 - BI Application Scenario

Work through a practical business case that connects BI concepts to leadership action.

Learning Outcomes

- Describe BI fundamentals.
- Recognize strong dashboard design principles.
- Interpret visual performance information.
- Connect BI outputs to business decisions.

Who Should Attend

Leaders, managers, analysts, performance teams, operations teams, finance teams, project leaders, and professionals involved in reporting or decision support.

Professional Impact

Builds high-value digital fluency for decision support, reporting, analytics, and performance management.

Bring this workshop to your team

Immediate application through facilitated practice, real business scenarios, and practical implementation discussion.
