Program Overview

Data Analysis helps professionals become more confident using data to understand performance, identify variation, and support business decisions. The workshop is practical, accessible, and focused on workplace application rather than academic theory.

Scope

Foundational analytical capability for professionals who interpret operational data and support evidence-based business decisions.

Core Content Areas

Descriptive Analytics Basic Statistics Variability Excel Tools

BUSINESS IMPACT

Strengthens decision quality, reduces assumption-based management, and improves confidence in interpreting performance data.

Curriculum Overview

Data Analysis - public program map

Detailed templates, facilitator guides, examples, and proprietary implementation logic are reserved for enrolled participants and authorized N1_ delivery teams.

Block 1 - Data Thinking for Business

Explore the role of data in operational decisions, problem solving, and performance improvement.

Block 2 - Descriptive Analysis

Introduce practical summary views that help participants describe and compare performance.

Block 3 - Variation & Interpretation

Recognize basic variability and avoid common interpretation mistakes in business data.

Block 4 - Practical Business Analysis

Apply high-level analysis concepts to a business scenario and communicate conclusions.

Learning Outcomes

- Interpret basic business data sets.
- Recognize patterns and variation.
- Summarize performance findings.
- Communicate insights in a clear business context.

Who Should Attend

Managers, analysts, supervisors, coordinators, project leaders, quality teams, operations teams, and professionals who work with business data.

Professional Impact

Builds an essential modern business skill for analytical roles, leadership decisions, and continuous improvement.

Bring this workshop to your team

Immediate application through facilitated practice, real business scenarios, and practical implementation discussion.
